Contents of Volume 89

Number 1, 7 March 1981

GALVEZ, J. and VARON, R., I. Transient Phase Kinetics of Enzyme Reactions 1

GALVEZ, J., VARON, R. and CANOVAS, F. G., II. Transient Phase of Two-substrate Enzyme Systems 19

GALVEZ, J., VARON, R. and CARMONA, F. G., III. Kinetics of Enzyme Reactions with Inactivation Steps 37

VOLKENSTEIN, M. K., Simple Physical Presentation of Enzymatic Catalysis 45

MAZAT, J-P., GRAVES, P-V. and LABOUESSE, B., Coupling in Relaxation Experiments as a Diagnostic Tool to Discriminate Among Different Antico-operative Models 53

HASTINGS, A., Simultaneous Stability of $D = 0$ and $D \neq 0$ for Multiplicative Viabilities at Two Loci: An Analytical Study . . 69

COSMIDES, L. M. and TOOBY, J., Cytoplasmic Inheritance and Intragenomic Conflict 83

ELASSER, W. M., Principles of a New Biological Theory: A Summary 131

MCMURTRIE, R., Suppression and Dominance of Trees with Overlapping Crowns 151

HERBERS, J. M., Reliability Theory and Foraging by Ants . . 175

LETTER TO THE EDITOR

JERZMANOWSKI, A. and STARON, K., Can Phosphorylation of Histone H1 be Responsible for Chromatin Condensation in Mitosis? 191

Number 2, 21 March 1981

AMIDON, G. E., HO, N. F. H., FRENCH, A. B. and HIGUCHI, W. I., Predicted Absorption with Simultaneous Bulk Fluid Flow in the Intestinal Tract 195

ECONOMOS, A. C., The Largest Land Mammal 211

AMAR-COSTESEC, A. and BEAUFAY, H., A Structural Basis of Enzymic Heterogeneity Within Liver Endoplasmic Reticulum . 217

KEMENY, G., STRALEY, J. P. and STRONG, K. A., Single File Ion Diffusion and the Schmoluchowski Equation 231

ZEEMAN, E. C., Dynamics of the Evolution of Animal Conflicts . 249

Index to Volume 89

Absorption rates, predicted, with simultaneous bulk fluid flow in the intestinal tract, 195
Age distribution from continuous biochemical reactors with cell reproduction by mitosis, 321
Allometric interpretation of the self-thinning rule, 475
AMAR-COSTESEC, A. and BEAUFAY, H., A structural basis of enzymic heterogeneity within liver endoplasmic reticulum, 217
AMIDON, G. E., HO, N. F. H., FRENCH, A. B. and HIGUCHI, W. I., Predicted absorption rates with simulteneous bulk fluid flow in the intestinal tract, 195
ANGULO, J. J. (see TSOKOS, J. O.), 341
Animal conflicts, dynamics of the evolution of, 249
Anisogamy, on its evolution from isogamous monoecy, and on the origin of sex, 573
Antico-operative models, coupling in relaxation experiments as a diagnostic tool to discriminate among different, 53
Ants, foraging by, and reliability theory, 175
AOKI, K. and MOODY, M., One- and two-locus models of the origin of worker behavior in Hymenoptera, 449
ARENAS, C. A., LACOURLY, N., SEPÚLVEDA, A. and TOHÁ, J. C., Biological molecular information and its representation, 335
ARYA, D. (see SAXENA, V. P.), 423
Aulacantha scolymantha, the mechanism of spindle-free chromosome movement in; possible prepatterns governing mitosis, 353

BASS, L., Functional zones in rat liver: the degree of overlap, 303
BEAUFAY, H. (see AMAR-COSTESEC, A.), 217
BECK, K., A mathematical model of T-cell effects in the humoral immune response, 593
Binding operon, non-competitive, mathematical expression for the rate of initiation and certain prediction on; the *Escherichia coli* lactose operon, 271
Biochemical reactors, continuous, with cell reproduction by mitosis, the age distribution from, 321
Biological molecular information and its representation, 335
Biological significance of liver cell polyploidy: an hypothesis, 557
Biological theory, new, a summary of the principles of, 131
BLICK, J. (see BORGIA, G.), 523
BORGIA, G. and BLICK, J., Sexual competition and the evolution of hermaphroditism, 523
Bulk fluid flow, simultaneous, in the intestinal tract, predicted absorption rates with, 195

Calcium and magnesium ions, free, model of mitosis based on antagonistic changes of intracellular concentration of, 501
CANOVAS, F. G. (see GALVEZ, J.), 19

CARMONA, F. G. (see GALVEZ, J.), 37
CARPENTER, S. R., Decay of heterogeneous detritus: a general model, 539
Catalysed reactions, enzyme-, two new schematic rules for rate laws of, 581
Catalysis, enzymatic, simple physical presentation of, 45
Cell reproduction by mitosis, the age distribution from continuous biochemical reactors with, 321
Chemical analyses of umbilical cord blood, their use for the computation of instantaneous fetal growth, 433
CHIANG, A. S. T. and THOMPSON, R. W., The age distribution from continuous biochemical reactors with cell reproduction by mitosis, 321
CHOU, K-C., Two new schematic rules for rate laws of enzyme-catalyzed reactions, 581
Chromatin condensation in mitosis, can phosphorylation of histone H1 be responsible for? (letter), 191
Chromosome movement, spindle-free, in *Aulacantha scolymantha*, the mechanism of; possible prepatterns governing mitosis, 353
Chromosome replication, eukaryotic, and the radial loop model (letter), 715
Conflicts, animal, dynamics of the evolution of, 249
COSMIDES, L. M. and TOOBY, J., Cytoplasmic inheritance and intragenomic conflict, 83
Coupling in relaxation experiments as a diagnostic tool to discriminate among different antico-operative models, 53
Cytoplasmic inheritance and intragenomic conflict, 83

$D = 0$ and $D \neq 0$, simulataneous stability of, for multiplicative viabilities at two loci; an analytical study, 69
Dermis, epidermis and subdermal tissues, steady-state heat distribution in, 423
Detritus, heterogeneous, decay of; a general model, 539
Dominance and suppression of trees with overlapping crowns, 151

ECONOMOS, A. C., The largest land mammal, 211
ELSASSER, W. M., Principles of a new biological theory: a summary, 131
Endoplasmic reticulum, liver, a structural basis of enzymic heterogeneity within, 217
Enzymatic catalysis, simple physical presentation of, 45
Enzyme reactions, transient phase kinetics of, 1
Enzyme reactions with inactivation steps, kinetics of, 37
Enzyme systems, two-substrate, transient phase of, 19
Enzyme-catalyzed reactions, two new schematic rules for rate laws of, 581
Enzymic heterogeneity within liver endoplasmic reticulum, a structural basis of, 217
Epidermis, dermis and subdermal tissues, steady-state heat distribution in, 423
Escherichia coli lactose operon; mathematical expression for the rate of initiation and certain prediction on the non-competitive binding operon, 271
Eukaryotic chromosome replication and the radial loop model (letter), 715
Evolution of anisogamy from isogamous monoecy, and the origin of sex, 573
Evolution dynamics of animal conflicts, 249
Evolution of hermaphroditism, and sexual competition, 523
Evolutionarily stable strategy, learning the, 611

FABER, J. J. and WOODS, L. L., The use of chemical analyses of umbilical cord blood for the computation of instantaneous fetal growth, 433
Fetal growth, instantaneous, the use of chemical analyses of umbilical cord blood for the computation of, 433
Foraging by ants, and reliability theory, 175
Fraser's spatial indicators, distributions for, 513
FRENCH, A. B. (see AMIDON, G. E.), 195
Functional zones in rat liver: the degree of overlap, 303

GALVEZ, J. and VARON, R., I. Transient phase kinetics of enzyme reactions, 1
GALVEZ, J., VARON, R. and CANOVAS, F. G., II. Transient phase of two-substrate enzyme systems, 19
GALVEZ, J., VARON, R. and CARMONA, F. G., III. Kinetics of enzyme reactions with inactivation steps, 37
Gas chromatographic (GLPC) model for the sense of smell, Variation of olfactory sensitivity with conditions of stimulation, 387
GRAVES, P-V. (see MAZAT, J-P.), 53
GRIFFING, B., A theory of natural selection incorporating interaction among individuals. I. The modeling process, 635
GRIFFING, B., A theory of natural selection incorporating interaction among individuals. II. Use of related groups, 659
GRIFFING, B., A theory of natural selection incorporating interaction among individuals. III. Use of random groups of inbred individuals, 679
GRIFFING, B., A theory of natural selection incorporating interaction among individuals. IV. Use of related groups of inbred individuals, 691
GUNNING, B. E. S., ROBINS, R. J. and JUNIPER, B. E., Considerations of the estimation of plasmodesmatal frequencies: emendations to a previous paper by Robins and Juniper (letter), 711

HARLEY, C. B., Learning the evolutionary stable strategy, 611
HASTINGS, A., Simultaneous stability of $D = 0$ and $D \neq 0$ for multiplicative viabilities at two loci: an analytical study, 69
Heat distribution, steady-state, in epidermis, dermis and subdermal tissue, 423
HERBERS, J. M., Reliability theory and foraging by ants, 175
Hermaphroditism, sexual competition and the evolution of, 523
HIGUCHI, W. I. (see AMIDON, G. E.), 195
Histone H1 phosphorylation, can it be responsible for chromatin condensation in mitosis? (letter), 191
HO, N. F. H. (see AMIDON, G. E.), 195
Humoral immune response, a mathematical model of T-cell effects in, 593
HUNDING, A., Possible prepatterns governing mitosis: the mechanism of spindle-free chromosome movement in *Aulacantha scolymantha*, 353
Hymenoptera, one- and two-locus models of the origin of worker behavior in, 449

Immune response, humoral, a mathematical model of T-cell effects in, 593
Immunity restriction by the major histocompatibility complex, the significance of, and of the occurrence of high polymorphism at MHC loci: two hypotheses, 409
Inactivation steps, kinetics of enzyme reactions with, 37

Individuals, a theory of natural selection incorporating interaction among; the modeling process, 635
Individuals, a theory of natural selection incorporating interaction among; use of random groups of inbred individuals, 679
Individuals, a theory of natural selection incorporating interaction among; use of related groups, 659
Individuals, a theory of natural selection incorporating interaction among; use of related groups of inbred individuals, 691
Inheritance, cytoplasmic, and intragenomic conflict, 83
Intestinal tract, predicted absorption rates with simultaneous bulk fluid flow in, 195
Intragenomic conflict and cytoplasmic inheritance, 83
Ion diffusion, single file, and the Schmoluchowski equation, 231
Isogamous monoecy, on the evolution of anisogamy from, and on the origin of sex, 573

JERZMANOWSKI, A. and STARON, K., Can phosphorylation of histone H1 be responsible for chromatin condensation in mitosis? (letter), 191
JERZMANOWSKI, A. (see STARON, K.), 501
JOHANSEN, S. and KEIDING, S., A family of models for the elimination of substrate in liver, 549
JUNIPER, B. E. (see GUNNING, B. E. S.), 711

KEIDING, S. (see JOHANSEN, S.), 549
KEMENY, G. STRALEY, J. P. and STRONG, K. A., Single file ion diffusion and the Schmoluchowski equation, 231

LABOUESSE, B. (see MAZAT, J-P.), 53
LACOURLY, N. (see ARENAS, C. A.), 335
Lactose operon, *Escherichia coli*; mathematical expression for the rate of initiation and certain prediction on the non-competitive binding operon, 271
Land mammal, the largest, 211
Liver, a family of models for the elimination of substrate in, 549
Liver, rat, functional zones in; the degree of overlap, 303
Liver cell polyploidy, biological significance of; an hypothesis, 557
Liver endoplasmic reticulum, a structural basis of enzymic heterogeneity within, 217

MCMURTRIE, R., Suppression and dominance of trees with overlapping crowns, 151
Magnesium and calcium ions, free, model of mitosis based on antagonistic changes of intracellular concentration of, 501
Magnetic field variations, small, sensitivity of pigeons to (letter), 533
Major histocompatibility complex, the significance of immunity restriction by, and of the occurrence of high polymorphism at MHC loci: two hypotheses, 409
Mammal, the largest land, 211
MANABE, T., Mathematical expression for the rate of initiation and certain prediction on the non-competitive binding operon: the *Escherichia coli* lactose operon, 271

MAZAT, J-P., GRAVES, P-V. and LABOUESSE, B., Coupling in relaxation experiments as a diagnostic tool to discriminate among different antico-operative models, 53
Mitosis, the age distribution from continuous biochemical reactors with cell reproduction by, 321
Mitosis, can phosphorylation of histone H1 be responsible for chromatin condensation in? (letter), 191
Mitosis, possible prepatterns governing; the mechanism of spindle-free chromosome movement in *Aulacantha scolymantha*, 353
Mitosis model based on antagonistic changes of intracellular concentration of free calcium and magnesium ions, 501
Molecular information, biological, and its representation, 335
Monoecy, isogamous, on the evolution of anisogamy from, and on the origin of sex, 573
MOODY, M. (see AOKI, K.), 449
MORTON, T. H. (see NACHBAR, R. B.), 387
Multiplicative viabilities at two loci, simultaneous stability of $D = 0$ and $D \neq 0$ for; an analytical study, 69

NACHBAR, R. B. and MORTON, T. H., A gas chromatographic (GLPC) model for the sense of smell. Variation of olfactory sensitivity with conditions of stimulation, 387
Natural selection theory incorporating interaction among individuals; the modeling process, 635
Natural selection theory incorporating interaction among individuals; use of random groups of inbred individuals, 679
Natural selection theory incorporating interaction among individuals; use of related groups of inbred individuals, 691
Natural selection theory incorporating interaction among individuals; use of related groups, 659

Olfactory sensitivity, variation with conditions of stimulation; a gas chromatographic (GLPC) model for the sense of smell, 387

Phase, transient, of two-substrate enzyme systems, 19
Phase kinetics, transient, of enzyme reactions, 1
Phosphorylation of histone H1, can it be responsible for chromatin condensation in mitosis? (letter), 191
Pigeons, their sensitivity to small magnetic field variations (letter), 533
Polymorphism, high, at MHC loci, the significance of immunity restriction by the major histocompatibility complex, and of the occurrence of; two hypotheses, 409
Polyploidy, liver cell, biological significance of; an hypothesis, 557
Plasmodesmatal frequencies, considerations of the estimation of, emendations to a previous paper by Robins and Juniper (letter), 711

Radial loop model and eukaryotic chromosome replication (letter), 715
Rat liver, functional zones in; the degree of overlap, 303
Rate laws of enzyme-catalysed reactions, two new schematic rules for, 581
Relaxation experiments, coupling in, as a diagnostic tool to discriminate among different antico-operative models, 53

Reliability theory and foraging by ants, 175
ROBINS, R. J. (see GUNNING, B. E. S.), 711

SAXENA, V. P. and ARYA, D., Steady-state heat distribution in epidermis, dermis and subdermal tissues, 423
Schmoluchowski equation and single file ion diffusion, 231
Self-thinning rule, the allometric interpretation of, 475
SEPÚLVEDA, A. (see ARENAS, C. A.), 335
Sequential analysis of the influence of sex on the spread of the disease variola minor, 341
Sex, on the origin of, and on the evolution of anisogamy from isogamous monoecy, 573
Sex, sequential analysis of its influence on the spread of the disease variola minor, 341
Sexual competition and the evolution of hermaphroditism, 523
Single file ion diffusion and the Schmoluchowski equation, 231
Smell, a gas chromatographic (GLPC) model for the sense of; variation of olfactory sensitivity with conditions of stimulation, 387
SMITH, T. L. (see TSOKOS, J. O.), 341
